

# ASHLEY WILLIAMS

FULLSTACK WEB DEVELOPER & UI/UX ENGINEER

ashwillcode.com | (520)-840-5244 | ashwillcode@gmail.com

Full-stack engineer with production experience owning features end-to-end—from user flows and design through implementation and deployment. Combines UX-driven thinking with hands-on engineering to deliver accessible, scalable features across frontend and backend technologies in collaborative, product-driven teams.

## WORK EXPERIENCE

---

### UI/UX Engineer | STRONGMIND

Nov 2024 - Present

- Own and deliver full-stack features for K-12 education platforms, implementing user-facing functionality and backend updates within a Ruby on Rails codebase while prioritizing accessibility, performance, and maintainability.
- Collaborate closely with product, design, and engineering partners to translate ambiguous requirements into shipped features, contributing to user flows, interface decisions, and technical implementation.
- Redesign and rebuild existing pages and workflows to improve usability and reduce complexity, delivering production-ready solutions on accelerated timelines.
- Debug and resolve frontend and backend issues, including cross-browser inconsistencies, edge cases, and accessibility gaps, to ensure reliable and inclusive user experiences.
- Write and maintain RSpec tests, enforce code quality with RuboCop, and leverage AI-assisted development workflows to accelerate delivery while ensuring production standards through detailed pull requests.
- Design and maintain a shared design system by creating reusable components in Figma and translating them into React components documented in Storybook, ensuring consistency, scalability, and alignment with acceptance criteria.
- Refactored the attendance tracking system to reduce technical debt and improve performance and maintainability.
- Built the navigation framework for a content delivery platform, enabling intuitive course access and improving user experience for students, teachers, and guardians.

## SKILLS

---

Languages & Frameworks: JavaScript, Ruby on Rails, HTML, CSS, React, Tailwind CSS

Design & Prototyping: Figma, Storybook, Adobe Creative Suite

Testing & Quality: RSpec, RuboCop

Tools & Workflows: Git, Jira, Cursor, Agile/Scrum

## EDUCATION

---

Web Development Bootcamp, CareerFoundry

Coursework toward B.S. in Graphic Information Technology, Arizona State University
